PROFILE

Analytical and systems-oriented Information Systems graduate (S.Kom) with over 5 years of experience managing high-intensity technical operations and complex system monitoring. Proven track record in incident management, including identifying, logging, and escalating technical faults to ensure 24/7 operational stability for healthcare and e-commerce infrastructures. Experienced in building digital systems and platforms from the ground up, including founding and managing a self-built business (Javapedia). Skilled in maintaining high-precision system documentation and bridging the communication gap between technical operators, engineers, and end users. A fast-learning professional, highly capable of mastering SCADA monitoring protocols and industrial control system diagnostics to deliver exceptional technical support in a global remote environment.

WORK EXPERIENCE

JAVAPEDIA

Owner / Founder | Sep 2020 – Feb 2025

- Founded and managed Javapedia, a self-built digital business, from the ground up from initial website development to full business operations.
- Oversaw end-to-end platform management, including system stability, website maintenance, and customer-facing support via live chat.
- Recruited and managed a team of workers to handle service operations, while personally overseeing website/system reliability and customer communications.
- Implemented real-time incident logging and escalation procedures, coordinating with payment providers (Midtrans) to resolve API and server-side issues.
- Maintained 100% accuracy in financial records and transaction logs, ensuring audit-ready documentation.

RACHMAD HANDYCRAFT

Business & Digital Support | Dec 2022 – Apr 2025

- Designed and built the company's e-commerce website and support system from the ground up, later managing its stability and performing ongoing technical front-end updates to ensure a seamless and secure online transaction experience.
- Planned and executed digital advertising campaigns (ads promotion) to drive traffic and increase online sales conversion.
- Identified and optimized operational workflow inefficiencies, contributing to significant system performance improvements and revenue growth.

PT ANTOSA ARCHITECT

System Solutions Intern (Information Systems Intern) | Jun 2025 – Aug 2025

- Designed and developed a company-wide Management Information System (SIM) from the ground up from initial planning and development through full deployment which has since been actively used in the company's daily operations.
- Built a multi-role management system with secure access control, enabling systematic troubleshooting and streamlined workflows for diverse user groups.
- Coordinated technical communication with stakeholders to identify system bottlenecks and implement automated reporting workflows.
- Oversaw the full deployment and rollout of project modules, ensuring real-time data transparency, documentation accuracy, and successful adoption by end users.

Wuluhan Community Health Center

Technical Systems Analyst (Intern) | Nov 2025 – Jan 2026

- Acted as a primary technical consultant, diagnosing and resolving critical system-related issues to maintain constant operational stability for healthcare units.
- Monitored and analyzed complex operational workflows, translating real-time user feedback into functional system features and diagnostics.
- Conducted comprehensive system testing and debugging to ensure high data integrity across pharmacy, dental, and emergency service units.

Key Projects

JemberTrip: AI-Integrated Tourism Platform

- Led the development of a comprehensive tourism platform utilizing Retrieval-Augmented
- Generation (RAG) architecture, focused on building an intuitive chatbot designed to provide
- verified information and handle user inquiries based on structured datasets.

NutriMind: AI-Powered Nutrition Identification System

- Developed an AI-driven system designed to identify nutritional content directly from food
- photographs with high precision, ensuring accurate data mapping between visual inputs and nutritional databases to maintain system reliability and output verification.

Enterprise & School Management Systems

- Designed multi-role platforms featuring secure account management and automated billing workflows to streamline business operations.
- Built a web-based school attendance system with automated notifications to enhance real-time communication between administrators and users.

EDUCATION

Universitas Muhammadiyah Jember

Bachelor of Information Systems (S.Kom) | 2022 – 2026

- Systems Analysis, Business Process Optimization, Network Foundations, and Data-Driven Problem Solving.
- Head of Human Resource Development (PSDM) at HIMAFORSI (Information Systems Student Association) led technical mentoring workshops and peer-tutoring sessions for 100+ students, and curated technical learning modules for incoming freshmen.

SKILLS

Technical & Systems

- System Monitoring & SCADA Diagnostics
- Incident Lifecycle Management
- SQL & Database Management
- HTML, CSS, JAVASCRIPT, NODEJS, VUEJS, TYPESCRIPT, PYTHON, PHP, LARAVEL
- Web Development (Front-End)
- API Integration (Payment Gateway/Midtrans)
- RAG (Retrieval-Augmented Generation) & AI Systems

Customer Support & Communication

- Customer Support (Chat, Email, Phone)
- WhatsApp Business

Tools & Productivity

- Microsoft Excel (Advanced) · Microsoft Office Suite · Google Workspace (Sheets, Docs, Drive, Calendar)
- GITHUB
